

ATDI WINS CONTRACT TO DELIVER A SPECTRUM MANAGEMENT SYSTEM IN ARGENTINA

McLean, VA – ATDI, Inc. (ATDI) has just completed the initial delivery of a new Spectrum Management System (SGER) for the Federal Authority for Information Technologies and Communications (AFTIC) of Argentina. The contract requirements include the implementation of ATDI’s web solution for spectrum management, Spectrum-E©, extensive workflow implementation, database migration, skill transfer, software customization, and related maintenance services. The system will enable M2M service based interaction between the Argentinean public and the AFTIC for the purposes of submitting licensing requests and billing.

In July of 2014, AFTIC launched an international request for proposals for a Computer-based Integrated Solution in Support of Radio Spectrum Business Processes. On March 26, 2015 AFTIC awarded the decision for the acquisition of the new SGER to ATDI, Inc., which is located in McLean, VA (United States). ATDI commenced delivery of the various milestones related to the contract on April 8, 2015. The system will allow AFTIC to manage the allocation and licensing of the entire radio spectrum in Argentina. The initial milestone corresponding to software licenses, and project management related deliverables was completed on May 29, 2015. ATDI will continue with completing its pre-implementation analysis, database migration, business process implementation, skill transfer and additional customizations over the coming 10 months. ATDI will consolidate AFTIC’s spectrum management data within Spectrum-E’s NoSQL data-store. The new SGER is expected to go live by April 2016.

About ATDI, Inc. – ATDI is a world leader in the implementation of automated spectrum management systems. ATDI has over 22 years of experience in the areas of software development of RF network planning and spectrum management systems. In the past few years, ATDI has begun migrating its software product to an open web architecture. ATDI’s web solution for spectrum management has garnered significant interest in the telecommunications market. Today, ATDI has over 500 customers around the world, including more than 90 national spectrum authorities. ATDI’s software platforms and tools such as [Spectrum-E©](#), [ICS Telecom](#), [HTZ Warfare](#), and [ICS Map Server](#) are world renowned for their ease of use and accuracy.
